ABOUT AML BITCOIN

AML BitCoin was created with anti-money laundering, anti-terrorism and theft-resistant properties built into the code of the coin, and as a result, it is compliant with a host of laws. AML BitCoins are compliant with AML, CFT, AFF, OFAC, BSA, USA PATRIOT ACT, FACT and others.

The NAC Foundation utilizes a biometric identification system to verify owners of wallets that hold the AML BitCoin. This will provide additional security and safety features for ownership and use of the AML BitCoin.

There will be 76 Million AML BitCoin Tokens (AML Tokens) available for public purchase. Upon completion and activation of the AML BitCoin, AML Token holders will have the opportunity to exchange them for AML BitCoins on a 1:1 ratio. In making this exchange the token holder will have had to create a certified digital identity profile in association with the DTN.

01.

What is AML BitCoin?

AML BitCoin has been designed by the NAC Foundation, and builds on the AtenCoin platform. The cryptocurrency has built in KYC/AML, anti-theft and anti-criminal features, as well as biometric identification built into the platform. This enables it to be used by companies and individuals transacting with State, Semi-State, Regulated and Unregulated bodies.

All AML BitCoin transactions are transparent and recorded in a public ledger, and the senders and receivers are pseudonymous to the public. The transaction validation is decentralized. Every AML BitCoin holder can join this process through PoW/PoS mining.

02.

Who can use AML BitCoin?

The AML Token can be purchased by token purchasers around the world. For those looking at using AML BitCoin for transactions, a series of KYC/AML and real-life verification is required. Once completed, all verified network users can transact with each other knowing counterparties are not on Sanctions Lists. AML BitCoin is the only cryptocurrency that is compliant with the U.S. Patriot Act, Bank Secrecy Act, Anti-Money Laundering and U.S. Office of Foreign Assets Control law as well as other worldwide standards.
